

# THYRISTOR UNIT(TPR)

1Ø Digital Type

CE RoHS

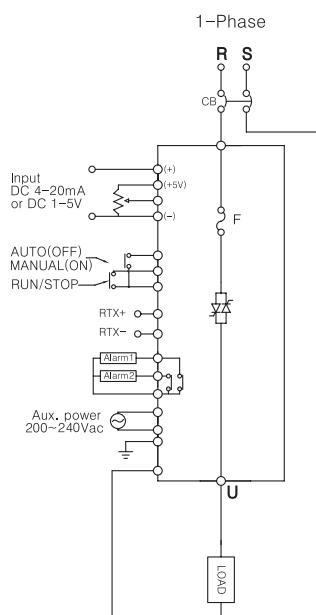

## Heater Load & Transformer Control Type

단상 Digital 전력 제어의 제품으로 위상 제어 및 사이클제어가 겸용으로 선택 가능하도록 되어있고 정전압, 정전류, 정전력방식을 LCD 화면상에서 선택 가능하여 1대의 제품으로 모든 정정이 가능하고 제어상태, 출력전류, 방열판 상태 등이 LCD 창에 표시되어 부하의 상태를 알수있는 기능과 경보용 Alarm 접점이 구비되어 있어 보다 안전하게 사용 가능하며 원격에서도 모니터할 수 있는 RS-485 통신 방식을 채택한 Digital 전력제어 유닛입니다.

As a single-phase digital power control unit, this product has an option to select phase control or cycle control, has an option to select a constant voltage, a constant current or a constant power on an LCD to enable any correction with one product, displays the control state, output current, radiator state, etc. on an LCD to notify the load conditions, has alarm contacts for safer use, and adopts a RS-485 communication method to be monitored even remotely.

Related Standard : EN 609747-4-3:2014  
EN 609747-1-3:2007/A2:2014

### ● Connection Diagram

### ● Specifications

ITEM	MODEL
Module	WYU-SD200/250/320SM
Aux. Power	SCR (6Arm)
Rated Voltage	200 ~ 240Vac
Frequency	Auto-Ranging : 90 ~ 500V
Rated current	Auto-Ranging : 50Hz / 60Hz
Control mode setting	200A, 250A, 320A
Soft Start setting	Phase, Constance current, Constance voltage, Constance power, Cycle
Load Type	Soft start : 0~50 sec, Soft up/down : 0~50sec
Display	Resistance Load / Inductance Load(Transformer 1'st)
Communication	LCD (2*16)
Control input setting	1~5Vdc, DC 4~20mA, VR (10kΩ), Jog dial, Modbus 485
Modbus 485 R/W (9600, 14400, 19200, 38400bps)	
Cooling Type	Modbus 485 R/W (9600, 14400, 19200, 38400bps)
Alarm Contact capacity	Fan cooling
Dielectric withstand	240VAC@5A / 24VDC@10A
Insulation resistance	Pri-Sec, Pri-Earth : 2000Vac for 1Minute
Operating temperature	Sec-Earth : 500Vac for 1Minute
Operating humidity	100MΩ(at 500Vdc mega)
Storage temperature	0~40°C (at non-freezing status)
Weight	-20~80°C (at non-freezing status)
	6.9kg
