TYPE : WY-S □ □

TYPE : WY-SH96 □ □

TYPE : WY-W □ □

● Specifications

- DC Ampere meter

| Type | Size(mm) | Input | Operating Principle | Class (%) | Burden (VA) | Weight(g) | Dimension | |
|-----------|----------|------------|---------------------|--------------|--------------|-----------|----------------------|--|
| WY-R05AD | 50×50 | DC 50mV | | ±2,5 | 50mV Drop | 100 | Refer to Page 220 | |
| WY-R06AD | 60×60 | | | | | 100 | | |
| WY-R08AD | 80×80 | | | | | 300 | | |
| WY-R10AD | 100×80 | | | | | 300 | | |
| WY-S47AD | 48×48 | | | ±1,5 | | 100 | Refer to Page 220 | |
| WY-S72AD | 72×72 | | | | | 200 | | |
| WY-S96AD | 96×96 | | | | | 280 | | |
| WY-SH96AD | 96×96 | | | ±1,0 ±1,5 | | 380 | Refer to Page 221 | |
| WY-W08AD | 80×80 | | | | | 300 | | |
| WY-W11AD | 110×110 | | | | | 470 | | |

- AC Ampere meter

| Type | Size(mm) | Input | Operating Principle | Class (%) | Burden (VA) | Weight(g) | Dimension | |
|-----------|----------|----------|---------------------|--------------|-------------|-----------|----------------------|--|
| WY-R05AA | 50×50 | 1A or 5A | | ±2,5 | 1,0 | 160 | Refer to Page 220 | |
| WY-R06AA | 60×60 | | | | | 160 | | |
| WY-R08AA | 80×80 | | | | | 160 | | |
| WY-R10AA | 100×80 | | | | | 160 | | |
| WY-S47AA | 47×47 | | | ±1,5 | | 120 | Refer to Page 220 | |
| WY-S72AA | 72×72 | | | | | 160 | | |
| WY-S96AA | 96×96 | | | | | 300 | | |
| WY-SH96AA | 96×96 | | | ±1,0 ±1,5 | | 380 | Refer to Page 221 | |
| WY-W08AA | 80×80 | | | | | 360 | | |
| WY-W11AA | 110×110 | | | | | 460 | | |

- Option #1 (input of DC Ampere meter)

| Rated input(DC) | |
|-----------------|-------------------------------------|
| Scale value | Remark |
| Direct (직가) | 200~500(μA) |
| | 1~500(mA) |
| | 1~5(A) |
| | 1~30(A) (R05, R06, S47 Type은 제외) |
| 50or100mV | DC5~1000A |
| | Ext. shunt |

| Input(A) | | Frequency | Extension Scale |
|----------------------------------|--------------------------------|--------------------|-----------------|
| Direct (직가) | 1A, 5A 10A, 15A 20A, 30A | 50Hz or 60Hz | 150~500% |
| withC,T | C,T5A C,T1A | | |
| Exception S47, R05, R06 Type은 제외 | | | |

PANEL BOARD METER

직류, 교류전류계 Ampere Meter (A)

● 교류, 직류 전류계

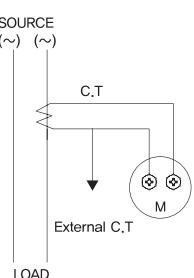

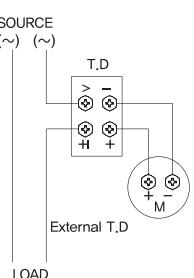

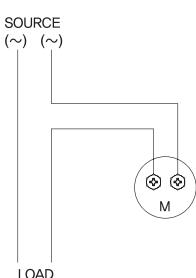

- 5A 이상인 전류 회로에서는 정격 2차 전류가 5A (1A) 의 계기용 변류기를 사용하십시오.
- 교류 전류계의 사용시 변류기를 외부에 부착 사용하며, 특히 전류계의 최대 눈금치와 계기용 변류기의 1차 전류와의 일치 여부를 확인하여야 합니다.
- 회로전압이 500V 이상인 경우에는 5A 이하인 회로일지라도 계기용변류기 (C.T) 를 사용하여야 합니다.
- 전동기(Motor) 에 사용할 전류계는 정격전류에 200%~500%에 해당하는 연장 눈금을 그려서 전동기의 기동 전류의 충격을 방지하며, 전류계의 수명을 연장시킨다.
- 연장눈금 계측기의 유효 측정 범위는 전체 눈금길이의 약 65%이며, 연장 눈금은 약 65%~100%사이에서 설정됩니다. (연장 눈금의 오차한계는 $\pm 8\%$)
- 교류 전류를 원거리로 전송할 경우는 Transducer (T/D) 와 직류계측기 를 조합하여 사용하며, T/D 사용시 T/D 출력과 직류 계측기의 입력을 일치시켜 사용하십시오.
- DC 계측기는 가동 Coil 형으로 제작하고 있으며, 가동 Coil 형은 눈금이 균등으로 표시되어 가동 철판형에 비하여 작은 부하에서도 전류치를 지시할 수 있는 장점을 가지고 있다.
- 30A 이상의 직류 전류계는 외부에 분류기(Shunt 50mV 또는 60mV) 를 연결 사용하십시오.
- 분류기(Shunt)를 외부에 부착 사용할 경우 전류계의 Full scale (50, 60mV) 과 Shunt의 2차 전압 (50mV, 60mV) 이 일치 하는지 확인하여야 하며 또한 최대 눈금치와 Shunt의 1차측의 전류도 일치 하는지 확인하여야 한다.
- 분류기(Shunt)의 결선은 (-) 쪽에 설치하여야 합니다.

● AC & DC Ampere meter

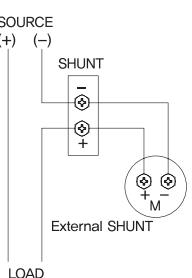

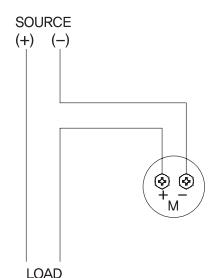

- To deal with current exceeding 5A, use a 5A (1A) meter in combination with a C.T.
- AC amper meter is used with a current transformer externally mounted, and it is noted that primary current of a current transform and a full scale of the meter are identical when used.
- If the circuit voltage exceeds 500V, even when the current is less than 5A, use a 5A(1A) meter in combination with a C.T to ensure insulation.
- The scale range of ampere meter for motor circuit is extended up to 150%~500% of rated current, so that these meters are necessary indicating extend scale with red mark for protect from the impact of the starting current and ensured of long life.
- An expanded scale has the normal maximum reading (upper limit of the effective measurement range) at the app. 65% point on the scale, and the rest of it (65%~100%) is devoted to extension reading. (tolerance of extension area : $\pm 8\%$)
- When making remote measurement the A.C current, the meter should be used the D.C meter with the transducer (T/D) If is noted that input of D.C meter to the output of transducer (T/D)
- The type of operating principle of ampere meter are the rectifier type, the moving coil type and the rectifier type ampere meter has a merit of measuring small current value compared with moving iron type.
- For higher ranges than 30A, use external shunt with a 50mV(60mV) instrument.
- When DC ampere meter is used with a shunt, it is noted that a full scale and a terminal voltage (50mV, 60mV) of the ampere meter are same as the rated primary current and secondary voltage of the shunt respectively.
- The shunt should be connected to the negative side line.

WY-SH96 KW, var PF Dimension

외부 변환기 사용

R, S, W08 타입의 Watt, var, Hz PF 계측기는 외부에 우측과 같은 변환기 (T/D)를 사용합니다.

External Transducers (For meter)

The Transducer for meter is used with the Watt, var and PF meter, etc., of the R type and S type or W08 type which it is external transducer.
