

THYRISTOR UNIT(TPR)

1Ø, 3Ø Remote Control Type

표시 조작부와 제어부를 분리하여 현장에서 설치할 수 있는 구조로 별도의 판넬에서 운전 조작을 할 수 있고 표시부에 운전 상황을 실시간으로 확인 가능하며 통신에 의한 다수의 병렬운전이 가능한 Remote Control Type의 전력제어 유니트(TPR)입니다.

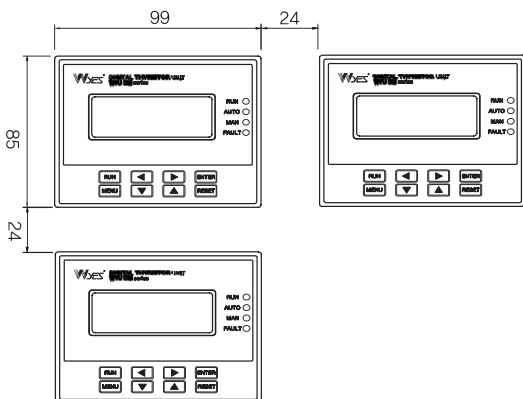

The product features a structure where the display unit and the control unit can be separately installed at site. Operation can be controlled from a separate panel while operating condition can be checked on a real time basis from the display unit. The remote control type thyristor power regulator (TPR) enables multiple number of parallel operation based on communication system.

● Specifications

ITEM		SPECIFICATION
Display Control Part	LCD Display Mode	20 X 4 LCD DISPLAY W/BACK LIGHT
	Key Part	8 (Run / Stop / ↑ / ↓ / ← / → / Menu / Enter)
	Indicator	4LED (Run / Auto / Man / Fault)
	Operating Mode	6 (Cv / Cc / Cp / Cycle / Phase / On-Off)
	Display Mode	5 (Pv / Sv / Mv / Ampere / Voltage)
	Communication	RS-485 / RS - 232
	Length	10m(Max)
Control Part	Operating Voltage	1Ø & 3Ø AC220/380/440V, 50/60Hz
	Rated Current	25/40/50/55/70/90/110/130/160/200/250/320/400/500/600A
